

Animal Homes

There are many different animal homes.

For example, a bee has a honeycomb.

The fluffy, gray squirrel,
Lives in a deep, dark burrow.

A dripping, green frog,
Lives in a muddy, wet bog.

Feathered owls live in trees,
With many, many leaves.

A slimy, blue fish lives in a pond pool,
Because he thinks it is very cool.

The beaver builds a lodge out of sticks.
Some people say it can be as strong as bricks.

The home I think is the best,
Is a bird's moss and twig nest.

Animals know as sure as fate,
How to take care of their homes, and make them great!
